To Whom It May Concern:

During the summer of 2008, Chisago Lakes ISD #2144 installed a synthetic turf field in our new football stadium. The synthetic turf field was installed by Field Turf but the preparation work at the site was done by Peterson Companies, Inc. Peterson Companies, Inc. did an excellent job in preparing the field for the actual installation of the synthetic turf.

Peterson Companies was the general contractor for our entire field project at Chisago Lakes High School. The High School field improvements consisted of a new track, new football stadium with synthetic turf, a softball field in one corner of the football stadium, several soccer fields, several softball fields, the football practice field and several parking lots. The entire project was over \$4 million. The on-site supervision by Curt Peterson was exceptional.

Chisago Lakes School District got a quality product and the project was on-time and on budget. I recommend Peterson Companies, Inc. for any project that you may have. They were a pleasure to work with and I would use Peterson Companies, Inc. again if I had the opportunity.

If additional information is needed, please contact me at (651) 213-2010.

Sincerely,

Heide Miller
Director of Business Services
