RE: Letter of Recommendation, Peterson Companies

To All Interested Parties:

On behalf of the group at ICS Consulting, Inc., it is with great honor that we write this letter of recommendation for Peterson Companies.

Peterson Companies was the primary contractor for the Chisago Lakes High School Campus Field Improvements Project. Work on the project was consistently executed in a timely and efficient manner. The quality of the work obtained exceeded specified performance expectations.

Peterson's project manager, Luke Kowarsch, possessed great communication skills both verbally and written. Pricing and paperwork for their scope of work were promptly submitted unremittingly. The work they successfully provided covered 109 acres and was prematurely completed despite the tightly allotted timeline.

Peterson's site grading project included a new baseball field, softball fields, a soccer field, parking lots, and a synthetic turf totaling the project cost to \$3.2 million.

The superiority of Peterson's end product in addition to the level of service they contributed has succeeded all of our requirements.

ICS Consulting, Inc. plans to continue doing business with them based on their success and we can, without any hesitation, recommend them to other potential clients.

Sincerely,

Scott Johnson
